Implementing
Business Support
Interventions to
Facilitate Change

Environmental,
Sustainability &
NetZero

brookconsult.co.uk

Brook's team of specialist environmental consultants work with your business to help you to consider the impacts both you and your business are potentially having on the environment, providing future-facing interventions for long term benefits.

Our consultants ensure your operation makes a long-lasting, positive impact through implementing the change needed. Brook are passionate about protecting the environment and recognise that development needs to happen across all sectors.

We Provide Commitment

Brook work with you to ensure your business practises are challenged and changed in line with good practice to provide commitment to environmental and sustainability enhancements and showcase your company's focus on the future.

We Reduce Waste

By working with us on your sustainability challenges, Brook can support you to reduce waste, recycling and consumption costs.

We Increase your Competitive Advantage

Brook provide assurance to your established consumer base to ensure your business is ready to capitalise on opportunities in a growing market. Your new environmental considerations will set you apart from your competitors via a robust environmental management system.

Format of Delivery

We start by getting to know your organisation via deep-dive sessions into the functionalities of your processes and current levels of environmental consideration.

Consultancy sessions can be in the form of facilitated team meetings to understand current awareness all the way to one-to-one sessions with individuals to recommend changes required for environmental benefits.

Ideas will be discussed, challenged and tested to establish a robust implementation/action plan.

Brook Consultants work with all departments as a joined-up, business approach to environmental change over singular departments.

The delivery will be bespoke to business needs and sessions will be dictated by participant availability, recognising their commitments to the ongoing management of the business.

Delivery will be on business premises or digitally via any online meeting platform such as Teams or Zoom.

Business Benefits

Brook will help to not only understand good environmental practices but will help the business facilitate a cohesive approach to sustainability and direct impact on change. Environmental change is not just about air pollution but encompasses a whole range of benefits both professionally and personally.
